SUMMARY

Software Engineer at Amdocs with 2 years of experience building reliable, scalable software for the telecommunications industry. Foundation in Java and Python, ships polished cross-platform apps with Flutter, and is currently broadening into C# for game engine work. Focused on clean architecture, measurable performance, and software that feels fast the instant you use it.

EXPERIENCE

Software Engineer — Amdocs, Telecommunications (2 years)

- Building and maintaining enterprise software for telecommunications products used at scale.
- Working in agile teams across design, development, code review, testing and release.
- Debugging and tuning production systems for reliability and performance.

SKILLS

Java — Backend logic, OOP and game fundamentals.

Python — Tooling, automation and rapid prototyping.

Flutter — Smooth cross-platform apps at 60 FPS.

C# (Learning) — Currently leveling up for game engine work.

PROJECTS

Cross-Platform Apps (Flutter, Dart, Mobile)

Production-style Flutter apps with clean state management and fluid animation.

Systems & Algorithms (Java, Python, Performance)

Performance-minded Java and Python work: data structures, optimization, profiling.

Interactive Portfolio & 10 Browser Games (HTML, CSS, JS, Web Audio API, Canvas)

Zero-dependency personal portfolio site with 10 self-built, live browser games spanning arcade, action, racing and shooter genres.

EDUCATION & DOMAIN

Industry domain: Telecommunications. Core languages: Java, Python, Flutter (Dart), C#.
